

Roadway/Structural Engineer 1 – Texas-based Civil Engineering Firm headquartered in Norman, OK. Will work primarily in the Allen, TX, office. Some overnight travel in TX and OK may be necessary. Duties require performing roadway and structural engineering design, preparing schematics and PS&E packages, and performing utilities' field surveys and bridge inspections. Will be involved in client interaction, marketing, and the prep of business proposals. Must have a bachelor's in civil engineering and 4 years of work experience with transportation engineering design OR a master's in civil engineering and 1-year engineering design experience. Work experience must have included roadway design. Must have a Texas Engineer-In-Training certification or at least 6 months of work experience with bridge inspections and land surveying. Knowledge of MicroStation, GeoPak, and/or transport AutoCAD, Civil 3D, and OpenRoads engineering software. Knowledge may be demonstrated by professional certification, 3 hours of coursework, and/or 6 months' work experience. All work experience requirements may be gained concurrently. Send inquiries to Debbie Bird, White Hawk Engineering & Design, LLC, 1821 E Imhoff Rd, Norman, OK 73071, or dbird@whitehawkmail.com. No calls or walk-ins. EOE.
